

Soline Villermois

I'm a **creative** and self-motivated french **geek** girl.
My past years in computer science allowed me to understand what I want for my future :
developing Web Applications, or analyzing, extracting, and transforming data in a **dynamic** team.
I want to improve myself with people who loves what they do, just like me.

I'm looking for a **full stack developer** job or a Junior **data analyst** job and, maybe, a bit of both...!

09. 2015 **2S2I for CMA CGM** *Marseille, France*

Software design and development Engineer

Design, development and maintenance of hybrid mapping applications in Innovation department. Implementation of a web application showing in real time all the vessels in activity in the world (around 100 000 positions) with satellite signal (AIS). This application encourages, among other things, to minimise the waiting times around the harbours and it also allows to "travel in time" and see the past trip of a vessel during a year (for legal purposes).
Usage of the agile software development methodology SCRUM.

04. 2013 - **CMA CGM** *Marseille, France*

09. 2015

Jr Software design and development Engineer

Developer of a mapping application used to display all roads taken by CMA CGM Container ships. Commercial Web Application allowing to show to the potential customers all the possibilities offered by CMA CGM for going from a point to another point.

04.2012 - **Dassault Aviation** *Istres, France*

06.2012

Implementation of a multimedia streaming server

Final year internship of my IUT (technical degree) at Dassault. My goal was to let all the authorized employees to watch video files recorded during flights, in order to overcome the current method (recording on VHS).
The purpose of my training was to look for streaming servers able to host these videos and retransmit it with access control and confidentiality.

Travelling

Travelling allows me to meet new people and to discover any other culture.

Reading

Reading allows me to escape from the real world, it gives me a feeling of freedom and creativity. It also permits to learn something new in every subject I want to.
